

## **FOR IMMEDIATE RELEASE**

Visiplex introduces the TS4200 a new member to its TimeSync product line that is specifically designed to provide a complete wireless time, bell and Public address solution for schools, campuses, hospitals and corporations.

**VERNON HILLS, IL – October 30, 2007** – Visiplex Time Systems, Inc., a leader in wireless synchronized time systems, introduced today a new member of its TimeSync product line that is designed for easier implementation of time & bell synchronization while providing Public Address announcement capabilities. The TS4200 controller is designed to be used as the heart of a wireless time and voice system within schools, campuses, medical facilities, manufacturing plants and other commercial applications.

### **About the TS4200 System**

A TS4200 wireless system includes a desktop time & voice controller with built-in, high-precision clock, antenna and a wide selection of radio transmitters from 8-350 Watts, to match any application needs. The TS4200 controller also offers optional microphone, telephone interface and a built-in user-programmable bell schedules. The TS4200 system is designed to work with all TimeSync new line of analog and digital wirelessly synchronized clocks, wireless Public Address speakers and alphanumeric LED displays.

The TS4200 system is fully expandable, allowing you to start with a system that fits your immediate needs while maintaining the ability to add more wireless speakers, clocks and LED displays if needed. The TS4200 is using a new efficient time synchronization protocol to enable multi-time zone system configurations and is fully UL, CE, CS & Industry Canada approved to provide reliable, maintenance-free operation for years.

### **Availability**

The TS4200 system is available for order now. **For more information about the TS4200 and the TimeSync Series, please call 1-877-918-8463, or check our website at <http://www.timesyncpro.com/>**
