

FOR IMMEDIATE RELEASE

Visiplex introduces the TS2950 a new member to its TimeSync product line that is designed to provide affordable wireless time synchronization for office buildings, libraries, financial institutions and corporations.

VERNON HILLS, IL – December 10, 2007 – Visiplex Time Systems, Inc., a leader in wireless synchronized time systems, introduced today a new member of its TimeSync product line that is designed for easier and more affordable implementation of time synchronization system. The TS2950 wireless time synchronizer is designed to be used within office buildings, industrial plants, libraries, financial institutions and corporations to eliminate inaccurate time display and Daylight Saving Time clock adjustments.

About the TS2950 System

The TS2950 comes with a built-in high precision real time clock, a WWVB atomic time receiver and a built-in low power UHF transmitter to provide affordable wireless atomic time synchronization to an area of up to 100,000 sq. ft. The TS2950 synchronizer is designed to work with all TimeSync new line of analog and digital wirelessly synchronized clocks. The TS2950 clock system is fully expandable, allowing you to start with a system that fits your immediate needs while maintaining the ability to add more wireless clocks if needed.

The TS2950 is using a new time synchronization protocol to enable multi-time zone system configuration and is fully UL, CE, CS and Industry Canada approved.

Availability

The TS2950 system is available for order now. **For more information about the TS2950 and the TimeSync Series, please call 1-877-918-8463, or check our website at <http://www.timesyncpro.com/>**
