

TS2100 Wireless Public Address Speaker

Solutions for:

- *Schools*
- *Manufacturing Plants*
- *Military Bases*
- *Campuses*
- *Government Facilities*
- *Office Buildings*
- *Medical Centers*
- *Shopping Malls*

The TS2100 is a wireless Public Address speaker that is designed for indoor and outdoor installations. This speaker is ideal for many applications where the installation of traditional hard-wired speakers would be impractical or impossible. This TS2100 speaker may be used independently, or to enhance existing bell and Public Address systems.

The TS2100 speaker can be activated individually or as a part of a group, allowing you to play bell and alert tones, send pre-programmed voice messages and make live voice announcements. The speaker volume can be remotely set to one of four levels with each activation. The TS2100 setup parameters can be reprogrammed over-the-air from the main encoder/transmitter.

The TS2100 is available with an integrated power backup option for uninterrupted operation during a power outage.

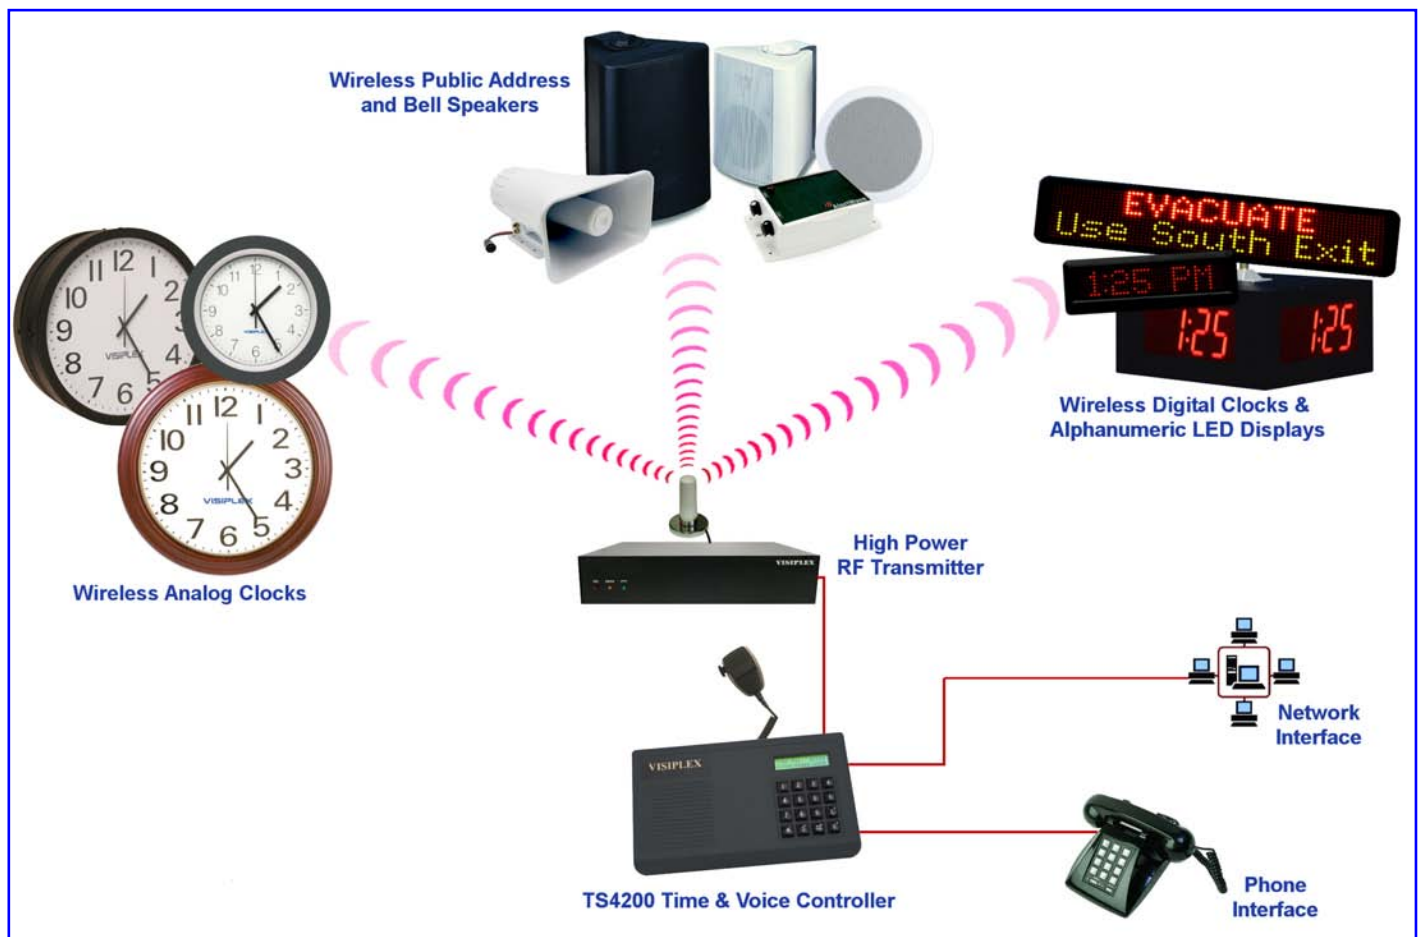

Features:

- *Indoor and outdoor wireless installations*
- *Integrated audio amplifier*
- *Wireless Public Address messaging*
- *Group and zone paging*
- *Easy wall-mount configuration*
- *Built-in preprogrammed alert tones*
- *Remote speaker volume control*
- *Integrated power backup battery*
